

KleanTop Belt Product Catalog

Conveniently Accessible Online Information

We realize the success of your business depends on up-to-date product information, superior technical support and customer service. Visit our website, www.rexnord.com, for additional product information, useful tools, and technical support options to help your business succeed.

Disclaimers

Rexnord® and KleanTop® are trademarks of Rexnord Corporation.

Friction values are derived from internal lab tests which can show differences compared to values in the field due to the conveyor design, conveyor robustness (how well the conveyors are built), temperature, humidity, speed, contamination, length chain has been in service, conveyed product material, design of conveyed product, recycled conveyed product vs new, cleaning procedure, etc.

Actual chain color can slightly vary from belt to belt, and within the same belt series itself. These variations are normal in the manufacturing of plastic components and are only cosmetic in nature. They do not affect the integrity or performance of the product.

Dimensions are subject to change.

Certified dimensions of ordered products are furnished upon request.

The Food and Drug Administration (FDA) accepts certain materials for direct food contact. FDA approved material is compliant to FDA 21 CFR § 177.

The contents of this catalog may not be reproduced in whole or in part without consent of the copyright owner.

Rexnord is continually investigating methods of improving products and introducing new technologies, and therefore reserves the right to modify data and features shown in this catalog at any time.

For updated information, please visit our web site at www.rexnord.com

Some or all of the products in this catalog may be protected by the following patents:

Rexnord KleanTop Belts

Rexnord KleanTop Belts provide a plastic modular belting solution for applications requiring adherence to strict hygiene regulations, such as those found in the food industry. Available in assembled-to-width and molded-to-width configurations, Rexnord KleanTop Belts are engineered to satisfy a wide range of conveyor applications for various product sizes. Products within the KleanTop line satisfy a wide range of needs in hygienic applications including temperature and abrasion resistance, heavy load carrying capacity and ease in cleaning.

Description	Format	Example 1	Example 2	Example 3	Explanation
Belts					
Material Prefix	...	WHT	BHT	SMB	Belt material from belt page
Belt Description	...	8505	1505DTS	2015	Belt description from belt page
Width Description	- ...	-6	-4.5	-21.33IN	Belt width from belt page
Flight Attachments					
Height	F...IN (MM)	-	-	DR3IN	Height of flight
Pitches Between Flights	T...P	-	-	T5P	1 = every row, 2 = every other row, etc
Side-Indent	N...IN (MM)	-	-	N2IN	Distance from edge of belt to side of flight
Sideguard Attachments					
Sideguard Height	ISR, S...IN (MM)	-	-	S2IN	Height of sideguard
Side-Indent	N...IN (MM)	-	-	N2IN	Distance from edge of belt to side of sideguard
Sprockets					
Sprocket Description	...	SSS8500	NS7700	N1500	Sprocket description
Number Of Actual Teeth	-...T	-25T	-21T	-7T	Actual number of teeth
Bore Diameter	...IN (...MM)	1-1/2IN	2-1/2IN	3/4IN	Bore diameter
No. of Keyways	...KW	1KW	-	-	Number of keyways required
No. of Setscrews	...SS	1SS	-	-	Number of setscrews required
Bore Type	...Bore	Idler	Square	Shaft-Ready	Bore type

When ordering, please use the guidelines outlined in the chart above to ensure accuracy.

Belt Guideline Examples:

WHT595-12IN is 595 belt in WHT; 12 inches wide.

SMB1095-18IN is 1095 belt in SMB; 18 inches wide.

WLT2015-24-F4IN T6P N2IN is 2015 belt in WLT; 24 inches wide with 4 inch flight every 6 pitches indented 2 inches.

Sprocket Guideline Examples:

KU590-36T 1-1/5IN S is a one piece Thermoplastic 590 Series machined sprocket with 36 teeth and 1.5 inch square bore.

KU1090-18T 1-1/5IN 1KW1SS is a one piece Thermoplastic 1090 Series machined sprocket with 18 teeth and 1.5 inch round bore with keyway and setscrew.

KUS1090-18T 2-1/5IN S is a split Thermoplastic 590 Series machined sprocket with 36 teeth and 2.5 inch square bore.

Sprocket Round Bore Nomenclature:

Shaft-Ready — Tight fit on the shaft with a keyway and setscrew.

Plain Bore — Same tight fit bore as a shaft-ready bore, but without keyway and setscrew.

Idler Bore — Round bore with a clearance fit (no keyway or setscrew). Designed to spin freely on the shaft.

Rough Stock Bore — Wide tolerance bore used for work in process. Not for use on any shaft. Must be further machined for actual use.

Overbore — Round bore with a slightly loose fit on the shaft with keyway but no setscrew. Designed to move laterally on the shaft during setup and still transmit torque through the keyway as a drive sprocket in the actual application. Not recommended for axial float in thermal applications.

1010 Series Flight Attachment (DRF-Style)

A flight with side-indent 0, 1" and 2" is available (1" indent is molded). Height of flight is 4" (available cut to lower height, with a minimum of 1/4").

1010 Series 2" SideGuard Attachment

Side Guard placed left and right with a minimum side-indent of 1.5".

1010 Series 3" SideGuard Attachment

Side Guard placed left and right with a minimum side-indent of 1.5" – a different running direction is special.

Shaft-ready bores are shipped with keyway and no setscrew. Idler bores are designed to spin freely on the shaft. Custom machined sprocket sizes are available on MTO basis. KU2010 sprockets are available in UHMWPE or abrasion resistant Nylon. Material must be noted when ordering.

Flight Attachment (F-Style)

All flight attachments are molded 6 in (152.4 mm) wide and in two heights: F6 with a 6 in (152.4 mm) height and F4 with 4 in (101.6 mm) height. Flight attachments can be cut down to a minimum height of 1/4 in (6.35 mm).

When ordering, please indicate if flight attachments are required every pitch, every second pitch, etc.

See page MT-OG for ordering guidelines.

Order example: WSM 2015 K30 F6 T6P N2 CN2 is a 2015 solid top belt in WSM material with a width of 30 in (762 mm) F6 flights located every 6th pitch with a side indent of 2 in (50.8 mm) and a center notch of 2 in (50.8 mm).

See Engineering Manual for back-flex information for belts with flight attachments.

Standard side indent is 1.33 in (33.9 mm) and 2.00 in (50.8 mm). Other side indents are available upon request.

Center notches are also available upon request.

Contact Rexnord FlatTop engineering for material options.

Curved Flight Attachment (C-Style)

All curved flight attachments are molded 6 in (152.4 mm) wide and in two heights: C6 with a 6 in (152.4 mm) height and C4 with 4 in (101.6 mm) height.

When ordering, please indicate if curved flight attachments are required every pitch, every second pitch, etc.

See page MT-OG for ordering guidelines.

Order example: WSM 2016 K18 C4 T3P N2 is a 2016 perforated top belt in WSM material with a width of 18 in (457 mm) C4 flights located every 3rd pitch with a side indent of 2 in (50.8 mm).

See Engineering Manual for back-flex information for belts with flight attachments.

Standard side indent is 1.33 in (33.9 mm) and 2.00 in (50.8 mm). Other side indents are available upon request.

Center notches are also available upon request.

Contact Rexnord FlatTop engineering for material options.

Double Ribbed Curved Flight Attachment (DRC-Style)

All ribbed curved flight attachments are molded 6 in (152.4 mm) wide and in two heights: DRC with a 6 in (152.4 mm) height and DRC with 4 in (101.6 mm) height.

When ordering, please indicate if curved flight attachments are required every pitch, every second pitch, etc.

See page MT-OG for ordering guidelines.

Order example: WSM 2011 K20 DRC T4P N2.66 is a 2011 nub top belt in WSM material with a width of 20 in (508 mm) DRC flights located every 4th pitch with a side indent of 2.66 in (67.6 mm).

See Engineering Manual for back-flex information for belts with flight attachments.

Standard side indent is 1.33 in (33.9 mm) and 2.00 in (50.8 mm). Other side indents are available upon request.

Center notches are also available upon request.

Contact Rexnord FlatTop engineering for material options.

Curved Flight Attachment (B-Style)

All bucket style flight attachments are molded 6 in (152.4 mm) wide and in two heights: B6 with a 6 in (152.4 mm) height and B4 with 4 in (101.6 mm) height.

Center notches are also available upon request.

See page MT-OG for ordering guidelines.

Order example: WSM 2015-30 B6 T6P N2 is a 2015 solid top belt in WSA material with a width of 30 in (762 mm) B6 flights located every 6th pitch with a side indent of 2 in (50.8 mm)

See engineering manual for back-flex information for belts with flight attachments.

Standard side indent is 2 in (50.8 mm). Other side indents are 1.33 in (33.9 mm) and 2.66 in (67.7 mm) and are available upon request.

When ordering, please indicate if bucket flight attachments are required every pitch, every second pitch, etc.

Sideguard Attachment

Standard side indent is 2 in (50.8 mm). Other side indents are 1.33 in (33.9 mm) and 2.66 in (67.7 mm). Other side-indents are available upon request.

SG4 Sideguards are molded 4 in (101.6 mm) high and can be cut down to a minimum height of 1 in (25.4 mm).

If the belt is ordered with sideguards and flights, the sideguard attachments will be furnished at the same height as the flight attachments (up to 4 in (101.6 mm)). All sideguards supplied in WLT or BLT material. Sideguards are situated 1/3 in (8.5 mm) from the flight, reducing the side indent by 2/3 in (16.9 mm).

Example sideguard specification:

WSM, WHT, or WLT link = WLT Sideguard

BLT or BHT link = BLT Sideguard

Example belt specification:

Order example: WSM 2016 K16 F4 T4P SG4 N2.66 is a 2016 perforated top belt in WSM material with a width of 16 in (406 mm) F4; 4 in (102 mm) flights located every 4th pitch (8 in (203.3mm)) side indent of 2.66 in (67.7 mm) from the edge of the belt to the flight. Distance from the edge of the belt to the sideguards is 2 in (50.8 mm).

2010 Series ISR Integrated Side Rail Attachment

If the belt is ordered with both ISR and flight attachments, the ISR attachment will be furnished the same height as the flight attachment.

ISR attachments are available with a 2 in. indents only.

The 0.66 inch rail offset creates a fixed dimension of 2.66 inches to the flight attachment.

ISR attachments are molded in 4 in. heights. Standard materials are POM and PP.

Please indicate if ISR attachments are required down one or both sides of the belt when ordering.

Please contact Rexnord Industries, Inc if any deviations from this standard are required.

Shaft-ready round bore sprockets are shipped with keyway and setscrew.

Flight Attachment (F-Style)

All flight attachments are molded 6 in (152.4 mm) wide and can be cut down to a minimum height of 1/4 in (6.35 mm).

The F3 designation represents an F-style flight attachment at a height of 3 in (76.2 mm).

Please indicate if flight attachments are required every pitch, every second pitch, etc. when ordering. Also, indicate if indents are required in the center, on one or both sides of the chain.

For example. "I would like F3 flight attachments every 8th pitch indented 3/4 in on both sides of the chain."

Flight Attachment (DRF-Style)

All flight attachments are molded 6 in (152.4 mm) wide and can be cut down to a minimum height of 1/4 in (6.35 mm).

The F6 designation represents an F-style flight attachment at a height of 6 in (152.4 mm).

Please indicate if flight attachments are required every pitch, every second pitch, etc. when ordering. Also, indicate if indents are required in the center, on one or both sides of the chain.

For example. "I would like F6 flight attachments every 8th pitch indented 3/4 in on both sides of the chain."

Sideguard Attachment

Please indicate if sideguard attachments are required down one or both sides of the chain when ordering.

Sideguard attachments can be cut down to a minimum height of 1 in (25.4 mm).

If the chain is ordered with both sideguard and flight attachments, the sideguard attachment will be furnished the same height as the flight attachment.

Please contact Rexnord if any deviations from this standard are required.

5998 Flight Attachment (F-Style)

All flight attachments are molded 6 in (152.4 mm) wide and can be cut down to a minimum height of 1/4 in (6.35 mm).

The F4 designation represents an F-style flight attachment at a height of 4 in (101.6 mm).

Please indicate if flight attachments are required every pitch, every second pitch, etc. when ordering. Also, indicate if indents are required in the center, on one or both sides of the chain.

For example, "I would like F4 flight attachments every 8th pitch indented 3/4 in on both sides of the chain."

For 5998 chain only.

Sideguard Attachment

Please indicate if sideguard attachments are required down one or both sides of the chain when ordering.

Sideguard attachments can be cut down to a minimum height of 1 in (25.4 mm).

If the chain is ordered with both sideguard and flight attachments, the sideguard attachment will be furnished the same height as the flight attachment.

Please contact Rexnord if any deviations from this standard are required.

Imperial shaft-ready round bore sprockets are shipped with keyway and setscrew. Metric shaft-ready round bore sprockets are shipped with keyway and no setscrew. Idler bores are designed to spin freely on the shaft.

Flight Attachment (F-Style)

All flight attachments are molded 6 in (152.4 mm) wide.

The F3 designation represents an F-style flight attachment at a height of 3 in (76.2 mm) that can be cut down to a minimum height of 1/4 in (6.35 mm).

If chain is to have flights and sideguards, flights must be spaced on even pitch increments.

Please indicate if flight attachments are required every pitch, every

second pitch, etc. when ordering. Also, indicate if indents are required in the center, on one or both sides of the chain.

For example, "I would like F3 flight attachments every 8th pitch indented 3/4 in on both sides of the chain."

Note: Not offered with 8505 Metric chain.

Sideguard Attachment

Please indicate if sideguard attachments are required down one or both sides of the chain when ordering.

Available sideguard indents are either 1.50 in (38.1 mm) or 2.25 in (57.2 mm) only.

Sideguard attachments can be cut down to a minimum height of 1 in (25.4 mm).

If the chain is ordered with both sideguard and flight attachments, the sideguard attachment will be furnished the **same height** as the flight attachment.

If chain is to have flights and sideguards, flights must be spaced on even pitch increments.

Please contact if any deviations from this standard are required.

Note: Not offered with 8505 Metric chain.

KleanTop Sprocket and Shaftdrop Height Adjustment

Sprocket and Wearstrip Location with Non-Raised-Rib Belts:

- The distance from the end of the wearstrip to the sprocket shaft centerline should equal dimension "C" (one belt pitch); otherwise, the wearstrip will interfere with the free articulation of the belt as it enters the sprocket
- The leading edges of the wearstrip should be beveled
- The following formulas and dimensions used in conjunction with the figure will give the proper shaft and wearstrip positioning

Sprocket Location For Conventional Belts:

$$A = (\text{Pitch Diameter}/2) - E$$

$$C = \text{One Belt Pitch (see table below)}$$

"C" equals one belt pitch which ensures support under belt at all times.

i Dimensions apply for both head and tail shafts

Shaft Drop Values for Conventional Chain

Belt Series	Chain Number	C Dimension		E Dimension	
		(in)	(mm)	(in)	(mm)
390	395	0.315	8.0	0.118	3.0
590	595/596	0.50	12.7	0.188	4.78
1010	1011/1015/1016/1018	1.00	25.4	0.200	5.08
1090	1095/1096	1.00	25.4	0.188	4.78
1200	1255/1275	1.25	31.8	0.250	6.35
2010	2011/2015/2016	2.00	50.8	0.320	8.00
5966	5966	1.50	38.1	0.250	6.35
5990	5998HD	2.25	57.2	0.360	9.14
8500	8506	0.75	19.1	0.170	4.32

Example:

For a 5996 belt utilizing a 14T sprocket:

$$A = (\text{Pitch Diameter}/2) - E$$

$$= (10.111 \text{ in}/2) - 0.360 \text{ in} = 4.696 \text{ in}$$

$$C = 2.25 \text{ in}$$

Metric:

$$A = (\text{Pitch Diameter}/2) - E$$

$$= (256.82\text{mm}/2) - 9.14\text{mm} = 119.27\text{mm}$$

$$C = 57.1\text{mm}$$

Tolerances:

$$A = +.03 \text{ in} / -.00 \text{ in} (+.8\text{mm} / -.0\text{mm})$$

$$C = +.25 \text{ in} / -.00 \text{ in} (+6.3\text{mm} / -.0\text{mm})$$

Above values are good only for sprockets mounted between support tracks. For sprockets mounted in line with support tracks:

$$C = \sqrt{\left(\frac{\text{O.D.}}{2}\right)^2 - (A-t)^2} + 0.125$$

$$A = (\text{Pitch Diameter}/2) - E$$

O.D. = Outside Diameter of Sprockets

t = Wearstrip Thickness

- Wearstrips in line with sprockets can also be angled back on the bottom for more clearance

All Rexnord KleanTop Belt is formed or molded from the highest quality materials available. From low friction to high temperature, we offer the widest selection of materials specifically tailored around the needs of our customers. We are committed to ongoing research and development allowing us to adapt to our customers and their demanding application requirements.

Rexnord KleanTop Materials

MATERIAL INDEX

Material Prefix	Description	Page	Primary Components	FDA Approved
BHT	Blue High Temperature	47	Polypropylene (PP)	Yes
BLT	Blue Low Temperature	51	Polyethylene (HDPE)	Yes
DUV	Acetal Ultraviolet Resistant	48	Ultraviolet resistant acetal (POM)	No
FTR	Fryer Temperature Resistant	49	Fryer Temperature Resistant Nylon (PA).	Yes
HUV	High Temperature Ultraviolet Resistant	50	Ultraviolet resistant polypropylene (PP)	No
SMB	Blue Cut Resistant	52	Cut and abrasive wear resistant acetal (POM)	Yes
WHT	White High Temperature	47	Polypropylene (PP)	Yes
WLT	White Low Temperature	51	Polyethylene (HDPE)	Yes
WSM	White Cut Resistant	52	Cut and abrasive wear resistant acetal (POM)	Yes

BHT**WHT****Brief Description**

Formulated to be used in both high temperature and general applications in both dry and wet conditions. A good general purpose conveyor chain material and in addition has excellent resistance to chemicals including salts, alcohol, bases and many acids.

Primary Components

Polypropylene (PP)

General Information

Prefix	Material	Temperature						FDA Approval
		Fahrenheit			Celsius			
		min	max		min	max		
			dry	wet		dry	wet	
WHT	White High Temperature	40	220	212	4	104	100	Yes
BHT	Blue High Temperature	40	220	212	4	104	100	Yes

Friction Factors Between Material and Product

Operating Condition	Product Material						
	Aluminum	Returnable Glass Bottles**	Non-Returnable Glass Bottles	Paper	Plastic (crates, shrink wrap, etc)	PET	Steel
Dry	0.29	0.29	0.24	0.35	0.32	0.28	0.31
Water	0.19	0.21	0.18	NR	0.24	0.20	0.25
Soap and Water	0.15	0.14	0.10	NR	0.19	0.15	0.17
Oil	---	---	---	NR	---	---	0.10

Friction Factors Between Material and Wearstrips

Operating Condition	Wearstrip Material			ULF
	Carbon and Stainless Steel	UHMWPE	Nylatron ⁺	
Dry	0.35	0.30	0.30	0.26
Water	0.30	0.25	0.25	0.22
Soap and Water	0.25	0.20	0.20	0.19
Oil	0.10	0.10	0.10	0.10

1. Buoyant in water.

Regulatory Information

The Food and Drug Administration (FDA) accepts certain materials for direct food contact. FDA approved material is compliant to FDA 21 CFR § 177.

⁺Nylatron® is a registered trademark of Quadrant Engineering Plastics Products.

DUV

Brief Description

Formulated to reduce or eliminate material degradation in applications where ultraviolet radiation exposure is a concern. Retains its mechanical integrity when exposed to direct sunlight (outdoor applications) as well as in applications that use ultraviolet radiation to run a process. Has the same strength and wear properties as plain acetal material.

Primary Components

Ultraviolet resistant acetal (POM)

General Information

Prefix	Material	Temperature						FDA Approval
		Fahrenheit			Celsius			
		min	max		min	max		
			dry	wet		dry	wet	
DUV	Acetal Ultraviolet Resistant (Black)	0	180	150	-18	82	66	No

Friction Factors Between Material and Product

NR denotes "not recommended", Dash denotes "combination not tested"

**Friction of returnable bottles will vary depending on the quality of the glass, the amount of roughed-up surface, etc.

FTR

**Brief Description**

Formulated to be used in oven / fryer discharge conveyor applications where the chain is exposed to high temperatures. Can resist contact temperatures up to 350°F (177°C). Used to convey high temperature products such as chips.

Primary Components

Fryer temperature resistant nylon (PA)

General Information

Prefix	Material	Temperature						FDA Approval
		Fahrenheit			Celsius			
		min	max		min	max		
			dry	wet		dry	wet

WLT

BLT

Brief Description

Formulated to retain toughness, impact strength and ductility in both dry and wet conditions. Retains its properties in temperatures as low as -100 °F (-73 °C). Has excellent impact resistance, and because of its inherent ductility, is excellent in applications where other materials may chip or fracture. Is also chemical resistant to most bleaches, bases, acids and hydrocarbons.

Primary Components

Polyethylene (HDPE)

General Information

Prefix	Material	Temperature						FDA Approval
		Fahrenheit			Celsius			
		min	max		min	max		
			dry	wet		dry	wet	
WLT	White Low Temperature	-100	80	80	-73	27	27	Yes
BLT	Blue Low Temperature	-100	80	80	-73	27	27	Yes

Friction Factors Between Material and Product

WSM

SMB

Brief Description

Formulated to be used in applications when superior wear and cut resistance is required. Can be used in both dry and wet conditions and in applications where abrasive wear due to products or environment is a concern. Cut resistant materials are commonly used in the meat processing industry on cutting, boning and trimming lines. Has good impact resistance and is as strong as standard acetal materials.

Primary Components

Cut and abrasive wear resistant acetal (POM)

General Information

Prefix	Material	Temperature						FDA Approval
		Fahrenheit			Celsius			
		min	max		min	max		
			dry	wet		dry	wet	
WSM	White Cut Resistant	-40	180	150	-40	82	66	Yes
SMB	Blue Cut Resistant	-40	180	150	-40	82	66	Yes

Friction Factors Between Material and Product

Operating Condition	Product Material

Why Choose Rexnord?

When it comes to providing highly engineered products that improve productivity and efficiency for industrial applications worldwide, Rexnord is the most reliable in the industry. Commitment to customer satisfaction and superior value extend across every business function.

Delivering Lowest Total Cost of Ownership

The highest quality products are designed to help prevent equipment downtime and increase productivity and dependable operation.

Valuable Expertise

An extensive product offering is accompanied by global sales specialists, customer service and maintenance support teams, available anytime.

Solutions to Enhance Ease of Doing Business

Commitment to operational excellence ensures the right products at the right place at the right time.
